

AI Video Generation

AI Video Generation Timeline

- **Early 2023 –Low resolution videos, melted textures, 3 second limits**

AI Video Generation Timeline

- **2024 – OpenAI releases Sora – 60 second photorealistic clips with complex physics are possible**
 - Remained in closed beta
- **Google Veo, Kling 1.0, and Luma Dream Machine launch**
 - Publicly accessible models

AI Video Generation Timeline

- **2025 – Diffusion Transformers (DiT) start to understand gravity, fluid dynamics, and “Character Lock”**
- **Google Veo 3, Sora 2, Runway Gen-3 Alpha, Haiper 2.0, Kling 2.6, Luma Ray 2**

2025: Sora 2 vs Google Veo 3

AI Video Generation Timeline

- 2026 – AI video models generate hyper realistic longer duration videos with audio and consistent characters
- **ByteDance Seedance 2.5, Kuaishou Kling 3.0,** Google Veo 3.1, OpenAI Sora 2, xAI Grok Imagine

Will Smith Eating Spaghetti Progression

2023 2024 2025 2026

**"WILL SMITH EATING SPAGHETTI"
BY SEEDANCE 2.0**

AI and Hollywood

- AI video generation represents a potential disruption for film studios
- Some studios are embracing AI

Innovation for Filmmaking, By Filmmakers: Why InterPositive Is Joining Netflix

InterPositive

- **Not a “text-to-video” product**
- **Build proprietary AI models trained on your film footage**
 - Digital cleanup of shots
 - Shot recovery
 - Relighting and reframing shots
- **Remove the “drudgery” of filmmaking**
- **Ben Affleck is helping integrate these AI tools across Netflix’s global production pipeline**
 - Netflix can reduce production time -
> new episodes faster
 - Netflix can reduce production cost -
> lower subscription fee?

Video Generation Models

Model	Creator	Cost per minute (low quality) [USD]	Cost per minute (high quality) [USD]
Seedance 2.5	ByteDance	10.00	30.00
Kling Omni 3.0	Kuaishou Technology	5.40	20.10
Veo 3.1	Google	9.00	24.00

- We can access all these models through Higgsfield

 Higgsfield

Higgsfield Models

- Higgsfield provides access to all the top video generation models
- Higgsfield provides access to all the top content generation models
 - Video
 - Audio
 - Image

Higgsfield Tools

- Higgsfield has many useful content creation tools
- Also has a “supercomputer” which is sort of like an AI vibe coder for videos

Video Gen. MCP Servers

- Higgsfield has an MCP server you can connect to your AI vibe coder
- Allows you to do all content generation functions through chat (no code needed)

Content Moderation in Higgsfield API

- Higgsfield will not make videos of celebrities

×

Media upload agreement

This process follows Higgsfield AI's terms of service
By starting, you agree to our [Terms of Service](#) and [Privacy Policy](#). Violations may lead to account suspension and legal liability.

The media I upload is mine
I certify that I own or have permission to use all media I upload for content generation.

People in my images have given consent
You must have permission for every visible face. Use AI responsibly.

I understand generation uses compute credits
It takes time and consumes credits. Track usage in your profile.

☒ I confirm I have the legal right to use this image and that it does not contain the likeness of any individual without their explicit consent

☒ I have read and agree to Higgsfield's Terms of Use, and I acknowledge that the content I upload is subject to automated screening and may be blocked

Cancel I agree, continue

Creating a Video in Higgsfield

- **We will use the Seedance 2.5 model**
 - **Very good cinematic quality and understanding**
- **Once we have a prompt for a video shot, we need to convert it to a suitable Higgsfield prompt**
- **We also need to include elements (images) for the characters and scene location**

Seedance Prompt

- Default model behavior is smooth AI motion, blank faces, centered talking heads, etc.
 - Not good for content
- A good Seedance prompt has the following structure

Prompt Structure

1. **Style first** — identity before story, or faces drift
2. **Notes** — emotion arc; adjectives alone fail (“looks sad”)
3. **Shot list** — sequential boards beat one fog paragraph
4. **Audio** — separate contract or the model scores it
5. **Constraints** — start + end are weighted → bookend rules

Director's Notes

DIRECTOR'S NOTES (1-7)

- | | |
|--|---|
| 1 Scene — situation, stakes, “faces not action” | 2 Acting — beat chain per character (order) |
| 3 Theme — one visual idea (aisle / wall / gap) | 4 Staging — masses, thirds, camera height |
| 5 Camera — living handheld vs locked / gimbal | 6 Secondary — breath, cloth, screens — not noise |
| 7 Light — key quality; faces always readable | ★ Theme repeats in every shot composition |

Example Prompt: Style Lock + Director's Notes

Style: STOP-MOTION ANIMATION — stepped frame-by-frame, a HAND-PAINTED 2D moving oil painting, NOT clay, NOT puppets, NOT 3D. True 12fps, ANIMATED ON TWOS: each pose held two frames then snapping, never gliding. Constant painterly BOIL. NO smooth interpolation, NO motion blur, NO morphing, NO liquid or melting surfaces — surfaces stay solid, motion is the redrawing of strokes, not AI slop. Style from <<>> — match its rendering, texture, palette and mood exactly. AKSAKAL (the elder) from <<>>, ANA from <<>>, the TRIBESMAN from <<>>, the yurt EXTERIOR from <<>>, the yurt INTERIOR from <<>>, THE INFANT from description: a small baby swaddled in a thick DARK BLUE wool blanket, held in ANA's arm, a small dark bundle, face barely visible, stirring faintly; NOT a second active child. Evening at a winter nomad camp in the snow. Atmospheric motion (drifting snow, breath-vapor, smoke, ember-glow flicker) moves SMOOTHLY; figures and any drawn snow step on twos with secondary action.

DIRECTOR'S NOTES:

1. THE SCENE — a quiet, heavy dialogue scene at dusk beside the yurt, the slow turning point of the story. Outside the yurt, a TRIBESMAN wearily argues to the AKSAKAL that the search must end — they cannot search forever, the wolves are eating all the livestock, the camp must move on to new pastures. Inside the yurt, ANA hears every word. This is a scene of FACES and PAUSES, not action — played slow, the emotion carried in held looks, micro-expressions and silence.
2. ACTING — THE HEART OF THE SCENE, faces must ACT in stepped held poses on twos, each beat given TIME: TRIBESMAN — weary and pragmatic, not cruel; tired eyes, a heavy resigned set to his face, spreading a hand toward the herd as he reasons, brows drawn with the hard sense of it. AKSAKAL — listening with great weight, his lined old face working through the pain of it; he understands the man is right and it is killing him, his jaw tightening, his eyes lowering, a slow heavy breath, the grief of a leader who must choose the many over the one. ANA (inside) — she hears the voices through the felt wall, and her face moves through it on twos: first a flinch, then dawning anguish, her eyes welling, her brow wrenching, lips pressing tight, her face crumpling at "leave her" — then, slowly, something HARDENING beneath the grief, a refusal setting in her jaw and her eyes, resolve being born. Hold on these faces, clearly lit and legible, never blank.
3. COMPOSITION TELLS THE STORY — SEPARATION is the visual theme: the felt WALL of the yurt is the border between the men outside and ANA inside, between the decision and the mother. Frame the wall between them; ANA pressed against the inner wall, divided from the voices by it. By thirds, never centered. Empty cold space and the dark wall as negative space of the gulf opening between ANA and the tribe.
4. FRAMED INK STAGING — read as masses: outside, the dark heavy mass of the AKSAKAL weighed with authority against the cold pale snow and dim sky; inside, ANA a dark grieving shape against the dark felt interior, lit low and warm by the ember-glow, the dark wall trapping her. CAMERA HEIGHT: slightly LOW on the AKSAKAL (his weight, his authority, the burden on him); intimate and level on ANA's face inside.
5. CAMERA — gentle living HANDHELD, breathing and soft, never gimbal-smooth or locked, never mechanical; this is a quiet scene so the camera barely breathes with the moment, holding on faces, a slow drift, motivated and human. Natural light only.
6. SECONDARY ACTION on twos — the AKSAKAL's white beard and chapán stirring in the cold wind with follow-through, the TRIBESMAN's clothing and breath-vapor, ANA's kimeshek ends and the dark-blue bundle shifting, breath-vapor of all torn off in the cold; smoke and ember-glow and drifting snow smooth.
7. LIGHT — cold blue dusk outside, warm low ember/firelight inside the yurt, soft, no sun, NO rays, NO beams, NO god rays, faces clearly lit and readable never black voids. Correct neutral white balance, NOT a blue filter, muted desaturated; the warm interior glow low and soft, not on the faces as a beam.

Example Prompt: Shot List

SHOT 1 — OUTSIDE THE YURT, TWO-SHOT, ~35mm, gentle handheld. COMPOSITION (not centered): the TRIBESMAN (<<>>) on the LEFT third and the AKSAKAL (<<>>) on the RIGHT third, the dark curved felt WALL of the yurt exterior (<<>>) filling the frame behind and between them — the wall a constant reminder of ANA unseen within; the cold snow camp falling away as negative space, dusk light dim and blue. The TRIBESMAN reasons wearily, spreading a hand toward the unseen herd, his tired face heavy, lips on twos:

"Biz onı mǎñğı ızdey almayмыз... Bōriler maldyñ bārın jeydı. Kōşuımız kerek."

HARD CUT to SHOT 2 — REVERSE ON THE AKSAKAL, MEDIUM-CLOSE, ~50mm, gentle handheld, framed slightly LOW. COMPOSITION: the AKSAKAL off-center, the dark felt wall of the yurt exterior (<<>>) behind him as a heavy dark mass, the cold dusk to one side as negative space. His lined old face works through the weight of it on twos — jaw tightening, eyes lowering, a slow heavy breath, the grief of choosing the many over the one. He gives a slow, heavy nod of bitter understanding, and answers low, lips on twos:

"Bilemın... Bilemın."

HARD CUT to SHOT 3 — INSIDE THE YURT, CLOSE ON ANA, ~50mm, gentle handheld, intimate and level. COMPOSITION (separation): ANA (<<>>) inside the yurt interior (<<>>) pressed against the inner dark felt WALL on one third, the dark wall the dominant mass beside her — the border through which the men's voices come, the dark-blue swaddled infant in her arm; warm low ember-glow on her face from the other side, the rest in shadow. She listens, and her face moves on twos — a flinch, then anguish welling in her eyes, her brow wrenching, lips pressing tight, her face crumpling — then, slowly, a HARDENING beneath the grief, refusal setting in her jaw and eyes, resolve being born. She looks toward the wall, toward the voices, decision forming. Hold on her face. End.

Example Prompt: Audio + Constraints

Audio: NO MUSIC — only natural diegetic sound: the low moan of cold wind over the camp, the crackle of a fire, the muffled bleat of distant sheep, the TRIBESMAN's weary voice and the AKSAKAL's heavy low reply outside, breath and the shift of felt, ANA's quiet shaking breath inside. No subtitles.

Constraints: stop-motion on twos at 12fps with painterly boil, never gliding, NO interpolation NO motion blur NO morphing NO liquid surfaces; drifting snow smoke ember-glow and breath-vapor smooth while figures step on twos; hand-painted oil look from <<>>, not photoreal, not 3D, not glossy; a quiet dialogue scene of FACES and PAUSES not action played slow emotion in held looks and silence; ACTING faces must ACT readable on twos given time — TRIBESMAN weary pragmatic not cruel tired eyes heavy resigned reasoning, AKSAKAL listening with great weight lined face working through pain jaw tightening eyes lowering heavy breath the grief of choosing the many over the one, ANA inside flinch then dawning anguish eyes welling brow wrenching lips tight face crumpling then slowly HARDENING refusal setting in jaw and eyes resolve being born; COMPOSITION SEPARATION the felt WALL of the yurt the border between the men outside and ANA inside frame the wall between them ANA pressed against the inner wall divided from the voices by thirds never centered the dark wall as negative space of the gulf opening between ANA and the tribe; FRAMED INK outside the dark heavy mass of the AKSAKAL weighed with authority inside ANA a dark grieving shape against dark felt interior lit low by ember-glow the wall trapping her camera height slightly LOW on the AKSAKAL his authority and burden intimate and level on ANA; CAMERA gentle living handheld barely breathing holding on faces motivated and human never gimbal-smooth never locked natural light only; AKSAKAL (<<>>) ANA (<<>>) TRIBESMAN (<<>>) yurt EXTERIOR (<<>>) yurt INTERIOR (<<>>) the infant from description a small dark-blue swaddled bundle in ANA's arm not a second active child; SECONDARY ACTION on twos white beard chapman kimeshek bundle clothing breath-vapor stirring smoke and snow smooth; cold blue dusk outside warm low ember-glow inside soft NO rays NO beams NO god rays faces readable never black voids neutral white balance not a blue filter muted desaturated; spoken Kazakh in Latin transliteration as written not Russian-accented; NO MUSIC only wind fire distant sheep and the voices.

Seedance Prompt Construction

- **The prompt is very complex and uses advanced film making terminology**
- **AI understands this structure and terminology**
- **We will use AI to convert our simple prompts into proper Seedance prompts**

Movie Production Flow

1. Make our screen play with Awesome-O agent
2. Create images and voices (elements) for all characters and locations in the movie
3. Upload the elements to Higgsfield via MCP server
4. Create the Seedance prompts for each shot (with reference to movie elements)
5. Create the shot videos in Higgsfield via MCP server (slow + expensive)
6. Dub voices in shot videos via MCP server
7. Combine shot videos into final movie file

Production Time and Cost

- **Making a 1 minute video with the entire flow: script, visual assets, and final videos**
 - **Screenplay – 5 minutes, basically free**
 - **Visual assets – 5 minutes, \$1.00**
 - **Videos – 40 minutes, \$20.00**
- **AI video production is still a bit too slow and expensive for creating true long-form content easily**

Coding Session

- **Choose a movie screenplay project**
- **Convert shots file into Seedance ready shots**
- **Create visual assets**
- **Create one seedance shot video**
